

**ARGUS** – Pressure Switch for Reliable Artificial Lift Shut Off, Explosion Proof Certified, 20 – 5000 PSI Field Adjustable Range, Proven Reliability and allows for field testing via Isolation valve and test ports.

**BERNARD / PIPER** – Well Head Electric ESD – Fail Close Spring Return Class 1 Div. 1, 110 VAC Electric Remote and Local Open and Close Options with Gear Over Rides.

**BETTIS / PIPER** - Hydraulic Self Contained Well Head ESD - Requires no external power to actuate. Installed on PIPER API 6A Pressure rated Ball Valves. Typically activated on loss of power to solenoid or hi-low pilot. Must manually pump valve back to open position upon ESD.

**DET-TRONICS** – Fire and Gas detection. Technologies include UV, UV/IR and Quad IR Flame Detection as well as Open Path LEL and H2S gas detection for fence line and large area monitoring.

**E2S** - Strobes and Horns – Many options of colors, area classifications, sounds etc.

**HAWKEYE** – Thief Hatches and PVRV's for Tank Protection and end of line protection on Oil and Condensate Tank Batteries. Incorporates Industry Leading Technology resulting in trouble free reliability and performance and lower cost of ownership.

**LANCASTER** – Automated Well Head Choke – Angle Body and In Line Patterns in various API 6A Sizes and Pressure ratings. Low Torque design allows for low power 12 or 24 VDC actuators. Features also include ease of repair in line, high range of control and superior trim life in severe service.

**MASON INDUSTRIES** – QUAD O Certified High Efficiency Flares. Options include Variable Speed Motor Driven Air Pump, Burner Management System with not electrical items at the tip and break away hand crank system for field work without lifting equipment

**NIVELCO** – Level & Temperature Transmitters and Switches. Technologies include Guided Wavelength and Burst Radar, Vibrating Fork all in Explosion Proof Area Classifications.

**FABRICATED EQUIPMENT** – ASME CODE STAMP SHOP. Products offered include Carbon Steel or Stainless Spool Pc's, Piping, Manifolds, Pressure Vessels. Additional options include various fabricated equipment options like Separators, LACT skids, Slug Catchers, Line Heaters, Heater Treaters, VRT's and more.

**TEK TROL** – Flow Meters and Pressure Transmitters including Coriolis, Orifice Plate, Mag Meter, Vortex as well as Differential Pressure and Pressure Transmitters all in Explosion Proof Area Classifications.

**TRIAC** - Electric Motor Operated Manifold Valves – Available in 110 VAC and 24 VDC Class 1 Div. 1 classification. Options include Modulating Service, Local and remote operation, Manual Over ride. Offered on API 6A and 6D Ball Valves for On / Off Service and 3 way Divert service.

**V-TORK / PIPER** – Electric On Off Actuators for quarter turn valves in 24 VDC and 110 VAC. Options include Local and Remote control and Manual Override
