

**ARGUS AUTOMATED MULTI PIG LAUNCHING VALVES** – API 6D Licensed and Monogrammed Actuated Pigging Valves. Typical applications include difficult to access remote installations, high pigging frequency in wet gas lines, CO<sub>2</sub> or H<sub>2</sub>S applications to reduce suiting up and Emission sensitive areas where venting reductions are required

**ARGUS – PIGGING BALL VALVES** – API 6D Licensed, Certified and Monogrammed in Manual and Automated, Single or Multi Pig capacity in sizes 2” thru 20” with flanges up to 1500 ANSI rating. Features include significantly reduced emissions (up to 91%) and product loss, lower cost, simplified operations and increased safety over traditional Barrel style launcher receivers.

**CDI / SYPRIS - PIG SIGNALER's** – Directional Pig Signaler, Boss Mounted with Visual Flag, Intrusive or Electrical Contact, Combination Flag and Electrical as well as Non-Intrusive Magnetic Options.

**FISHER CONTROL VALVES** – Your number 1 source for High Quality Remanufactured FISHER Control Valves, Regulators and Positioners

**GIRARD** - Foam Polly-Pigs, Steel Mandrel Pigs, Polyurethane Spheres, Solid-Cast Turbo Pigs and Spare Urethane Cups & Discs all manufactured by Girard at their plant in Houston, Texas.

**MODEC** – Portable Actuators including Battery Powered Electric, Pneumatic and Gas Powered options. Available in output torques up to 740 FT LBS with right angle and straight adapters to fit all valve and gear handwheels.

**FABRICATED EQUIPMENT – ASME CODE STAMP SHOP.** Products offered include Carbon Steel or Stainless Steel Spool Pieces, Piping, Manifolds, Pressure Vessels. Additional options include various fabricated equipment options like Separators, LACT skids, Slug Catchers, Line Heaters, Heater Treaters, VRT's and more.

**SNI - ULTRASONIC THICKNESS TRANSMITTERS** – Wireless or Hard-Wired Transmitters to remotely monitor Corrosion and Erosion in Pressure Vessels, Piping and Pipelines. Eliminates costly NDE programs via remote or local monitoring of critical wear areas.

**SYPRIS TECHNOLOGIES** – Sypris specializes in manufacturing Traditional and Quick Opening Closures for pressure applications that need frequent access such as pig traps, strainers, and more.

In addition to reduced emissions, the small footprint of the Argus Pig Valve minimizes environmental impact. Compared to conventional barrel-style launching and receiving traps, Argus Pig Valves are operationally more efficient and require less space, ultimately decreasing infrastructure costs.

**VOLTA – ZERO EMISSIONS CONTROL SYSTEMS** – New and Retrofit Applications. Works on All Brands of High-Pressure Actuators. Available in remote Mounted NEMA4, C1D2 or C1D1 12-24Vdc, Solar, 110-220Vac and 480Vac

**WALWORTH** - Thru Conduit Expanding and Slab Gate Valves. 2" – 36" Class 150 - 1500. API 6D Licensed with monogram, API 607/6FA, NACE MR-0175, ISO 9001. Available with Handwheel, Gear or Actuated.

**Wedge Rock** – High efficiency gears. Options include planetary and worm gears as well as spring return. Wedge Rock gears dramatically reduce torque and number of turns required compared to standard gears.
